Why It Sets Us Apart

Over 250 years of mastery results in highest quality, hand-crafted vodka.

Two years of R&D went into this blend, chosen for its great mouthfeel, texture and body.

We distill our vodka extra-high (192 proof) which means that there are no impurities that we have to filter-out.

Filtration is used to remove impurities but sacrifices mouthfeel: we preserve the body and mouthfeel of our vodka.

Once a year, we crush whole fruit. After our 6-month extraction process, we integrate it into our award-winning clear vodka.

It's pure fruit . . . it's clean . . . you can see the flavor.
