

**DISTILLERY & SALOON**  
PARK CITY · UTAH

## A TRULY UNIQUE EXPERIENCE

### SKI IN FOR A DRINK

Located at the bottom of Quittin' Time ski run and next to the Town Lift, High West Distillery and Saloon is the world's first and only ski-in gastro distillery. If you are looking for a truly unique dining and thirst quenching experience, we encourage you to drop your ski's on our rack or hitch your bike (or horse) and visit our restored mining era home. Our saloon makes some of the West's best drinks including cocktails, beer and wine. We offer Utah's widest selection of whiskies and our staff loves to share their knowledge about the differences between the world's great whiskies.

### STAY FOR DINNER

We use the term "saloon" to hearken back to Old West where saloons were "oases of glamour" and often the fanciest (or only) places in town to get a good meal and drink. Inspired by our high altitude, our Saloon is an intimate restaurant serving nouveau western fare in a small plate format. Bring your entire family (children are very welcome) and enjoy an incredible meal in one of our dining rooms.

### LEARN ABOUT DISTILLING

First and foremost, High West is a boutique distillery where we craft spirits for people who appreciate quality ingredients, small batches, and the distiller's personal touch. While you're here, take an educational tour of our distilling operation to see our traditional 250-gallon copper pot still and learn how whiskey is made.

### YOU OUGHT TO COME VISIT

High West has several wonderfully decorated rooms that can hold private parties from 10 – 175 people. Please consider us for your next event. We also have a General Store where you can purchase our fine spirits as well as unique whiskey related gifts. We love to share our passion for good food and beverage and promise to serve up a taste of the West unlike anything you've ever experienced.

## ABOUT OUR HOME

### THE HISTORIC "ELLSWORTH J. BEGGS HOUSE AND NATIONAL GARAGE"

Our home is listed on the National Historic Register and both buildings are important examples of Park City's early architecture during the mining period. A brief history:

The house was built in 1914 and is architecturally significant as one of only a few two-story Victorian style pyramid houses in Park City. The October 3, 1914 issue of the Park Record reported: "E.J. Beggs, the well known mill and carpenter, has pulled down his old home on lower Park Ave. and will erect on the site a modern 8 room, two story house. Mr. Beggs has one of the finest building lots in the city and a two-story house will set it off splendidly." Ellsworth

*Photo circa 1930's: Park City Museum, Pop Jenks Collection*

J. Beggs, a master carpenter, had just built the Summit County Courthouse in Coalville so a high quality home could be expected. Burnis and Betty Watts purchased the house in 1974 and lived in it until the City purchased it in 1997.

The National Garage was originally a livery stable to service the workhorses that pulled the heavy ore carts to the mines. During renovation we found a horseshoe and knew we had to make that our logo. Beggs rebuilt a smaller livery stable in 1907 for his "Beggs and Buckley Livery". As automobiles became popular, the partners began servicing cars, changing the name to Beggs and Buckley Garage. Local sign painter Roy Fletcher painted the original National Garage sign. Later, when the business became the Sinclair Park Motor, Fletcher painted the sign as well. The garage business operated until 1942.

*Photo circa 1930's: Park City Museum*

When the Silver King Coalition Mines Company building burned down in 1981, the heat was so intense it melted the paint away from several layers of re-painted signs to what you can see today.

## THE HIGH WEST STORY

With a background in biochemistry, a love of fine spirits and cooking, and a passion for the West, David Perkins decided to leave his job in the biotech industry and start a distillery to make a western whiskey. It didn't hurt that Jane, David's wife, had a great grandfather who started one of the country's leading distilleries turn of the century 1900. In 2007, after navigating Utah's complex licensing process, David opened High West Distillery - the first legal distillery in Utah since the 1870's. Since then, High West's spirits have won top accolades and national recognition.

### UTAH DISTILLED SPIRITS HISTORY

Utah has a fascinating distilled spirits history - High West is proud to be the latest chapter.

**1826 - Mountain Man Rendezvous** - The first recorded whiskey-fest out West happens in Cache County Utah.

**1857 - Salt Lake City has a Whiskey Street** - Main Street, between 2nd and 3rd South (see photo).

**1860's - Mark Twain and explorer Capt. Richard Burton**

**sample Valley Tan** - Twain calls it, "The exclusive Mormon refresher... made of imported fire and brimstone."

**1870 - Last known legal still in Utah**

**1884 - Park City incorporated** - Miners create Utah's best "watering hole."

**1933 - Utah provides 36th vote to end Prohibition** - "No other state shall take away this glory from Utah."

**2007 - High West Distillery opens** - Distilling returns to Utah. Yippee ki-yay!

## OUR SMALL BATCH, MOUNTAIN-CRAFTED SPIRITS

While High West's own whiskey ages, we're proud to offer the following very unique products:

**Rendezvous® Rye** — Rated 95 points by Malt Advocate and named one of their "Top 10 New Whiskies of 2008", Rendezvous is a complex whiskey that marries a rich aromatic 16-year-old rye and a bold spicy 6-year-old rye. This is a great sipping whiskey as well as the perfect whiskey for classic cocktails originally made with rye whiskey, like the Manhattan.

**Rocky Mountain Rye® 16 Year Old** — An unusual rye whiskey due to its very high 80% rye mash bill. Great for sipping with dessert or at the end of the evening.

**Rocky Mountain Rye® 21 Year Old** — A very rare rye whiskey that is incredibly smooth because it was aged in USED barrels. Another great sipping whiskey.

**Vodka 7000®** — Crafted from carefully distilled, locally grown oats and pure, snowmelt water with a high mineral content. Rated 92 points by the Tasting Panel Magazine and awarded Silver at the San Francisco World Spirits Competition. A creamy, full-bodied vodka that's great for sipping or in a very dry Martini.

**Utah Peach Vodka** — Infused with fresh, locally grown Brigham City peaches harvested at their peak. A completely different taste of fresh fruit, rather than artificial flavoring.

Please ask us about our High West Personalized Whiskey Barrel program. This gives the spirits aficionado a unique opportunity to purchase their own barrel of whiskey made in several styles: scotch, bourbon, rye, oat, and blue corn bourbon.

DISTILLERY & SALOON  
PARK CITY · UTAH

THE WEST. DISTILLED.™

High West's small batch spirits are available at finer restaurants and bars. Bottles are available for purchase at the High West Distillery and Saloon in Park City. Check our website to find locations near you or where you can buy online.
